Testing a task Management Application

TEST CASE DESIGN

REGISTRATION

TEST SCENARIOS

- 1-verify that a new user can register with valid details
- 2-verify registration with invalid details
- 3-verify registration with required fields are missing
- 4-verify registration with an already registered email

TEST CASES

POSITIVE CASES

VERIFY REGISTRATION WITH VALID DETAILS

FIRST:The user opens the registration page

Then fill your details

DATA YOU ENTER:

1. your valid name
2. your valid email address
3. your valid phone number
4. your valid password

then enter the submit button

If your data is correct you filled the correct details that means you have successfully registered and go to the next page

TYPE - positive

NEGATIVE CASES

1-VERIFY REGISTRATION WITH INVALID DETAILS

FIRST: the user opens the registration page

Then fill your details

DATA YOU ENTER:

1. valid name
2. valid phone number
3. the valid email address
4. But you enter the wrong password

Then press the Submit button

The registration will not be completed,an message will pop up displaying invalid pssword and you will not go on the next page

TYPE- negative

2-VERIFY REGISTRATION WITH REQUIRED FIELDS EMPTY

FIRST: the user opens the registration page

Then start filling the required registration details

DATA YOU ENTER:

1. valid name
2. valid phone number
- 3.but you forgot to write your email address
- 4.the you write your valid password

Then press the submit button

The registration should not be completed and you forgot to type your password message will be displayed

TYPE-negative

EDGE CASES

NAME

- 1-Enter the Minimum allowed number of characters
- 2-enter the Maximum allowed number of characters
- 3-enter a name containing spaces or supported special characters.

EMAIL

- 1-enter an email at the maximum allowed length
- 2-enter an email with uppercase letters
- 3-enter a valid email address

PHONE NUMBER

- 1-enter the valid phone number including the country code
- 2-enter a phone number with the exact maximum allowed digits
- 3-enter a phone number with minimum allowed digits.

PASSWORD

- 1-enter a password with exactly the minimum allowed length.
- 2-enter the password with exactly the maximum allowed length.
- 3-enter a valid password containing numbers,
- 4-enter a valid password containing special characters

LOGIN

TEST SCENARIOS

- 1-verify that a registered user can login with valid credentials
- 2-verify login with an incorrect password
- 3-verify login with an unregistered email address
- 4-verify login with an invalid CAPTCHA, if CAPTCHA exists

TEST CASES

POSITIVE CASES

1-LOGIN WITH VALID CREDENTIALS

Open the login page

Enter your registered email address

Enter your correct password

Enter correct CAPTCHA

Then press the login button

The user should be successfully logged in and will move to the next page

TYPE-POSITIVE

NEGATIVE CASES

1-LOGIN WITH INVALID CREDENTIALS

Open the login page

Enter your registered email address

Enter the incorrect password

Enter correct CAPTCHA

Then press the login button

The user should not be logged in and an error message should be displayed

TYPE-NEGATIVE

2-LOGIN WITH UNREGISTERED MAIL

Open the login page

Enter an unregistered email address

Enter a password

Enter correct CAPTCHA

Then press the login button

The user should not be logged in and an error message should be displayed

TYPE - NEGATIVE

3-VERIFY LOGIN WITH EMPTY PASSWORD

Open the login page

Enter your registered email address

Do not enter the password

Enter correct CAPTCHA

Then press the login button

The user should not be logged in and a password validation message should be displayed

TYPE-NEGATIVE

4-LOGIN WITH THE INVALID CAPTCHA

Open the login page

Enter an registered email address

Enter a password

Enter an incorrect CAPTCHA

Then press the login button

The user should not be logged in and an inappropriate captcha message should be displayed

TYPE-NEGATIVE

EDGE CASES

1- LOGIN WITH MAXIMUM ALLOWED EMAIL LENGTH

Enter a valid email at the maximum allowed length

Enter the correct password

Click login

The user should be logged in successfully

TYPE-EDGE

2-LOGIN WITH VALID PASSWORD CONTAINING SPECIAL CHARACTERS

Enter a valid registered email address.

Enter the correct password containing allowed special characters

Click login

The user should be logged in successfully

TYPE-EDGE

3-LOGIN AT THE CAPTCHA BOUNDARY

Enter valid login credentials and complete the CAPTCHA correctly at the allowed attempt/time limit

Click login

The application should process the login correctly

TYPE-EDGE

TASK CRUD OPERATIONS

SCENARIOS

1-CREATE

Verify that a logged-in user can create a new task

2-READ

Verify that a logged-in user can view the task list and created tasks

3-UPDATE

Verify that a logged-in user can edit an existing task

4-DELETE

Verify that a logged-in user can delete an existing task

TEST CASE

POSITIVE CASE

Create a task with valid details, View the task ,Edit it with valid details , Delete it All operations should complete successfully.

TYPE-POSITIVE

NEGATIVE CASE

Try to create/edit a task with invalid or empty required data , Appropriate validation/error message should be displayed and the operation should not be completed

TYPE-NEGATIVE

EDGE CASE

Perform CRUD operations using boundary values, such as minimum/maximum allowed task length Application should handle the operations correctly.

INPUT VALIDATION & ERROR HANDLING

SCENARIO: Verify that the application correctly validates user input and handles errors

TEST CASES.

POSITIVE CASE

Enter valid data in all required fields

Valid name,phone number,email address etc

The application should accept the input and complete the operation successfully.

TYPE-POSITIVE

NEGATIVE CASE

If you Enter invalid/empty data like invalid email entering,forgot to enter the name

The application should reject the input and display an error/validation message.

TYPE NEGATIVE

EDGE CASES

Enter special characters but valid input.

Submit the form with all fields empty.

TYPE – Edge

BUG IDENTIFICATION

1-user can already have the registered email address [severity-Major]

May create duplicate accounts.

2-login using incorrect credentials [severity-major]

Can allow unauthorized access.

3-one user can view another user's work[severity-major]

Causes privacy issues.

4-deleting task reappears after refreshing the application[severity-major]

Task is not properly deleted

5-invalid input is accepted without validation[severity-major]

Incorrect data may be stored

6-empty input is accepted without validation[severity-major]
7-login button works without entering the credential[severity-major]
User may access the system without authentication
8-delete button do not removes the selected task[severity-major]
User cannot remove unwanted tasks.

You are testing a **Task Management Application** with the following features: ● User **Registration & Login**

- Logged-in users can:
 - Create a task
 - View task list
 - Edit a task
 - Delete a task
- Tasks are stored in a database and displayed in a list

Assume the application is **close to production release** and has **no existing test documentation**.

Test Case Design

Write **test scenarios and test cases** for:

- Registration
- Login
- Task CRUD operations
- Input validation & error handling

Include **positive, negative, and edge cases**.

Bug Identification

List **8–10 potential bugs or risk areas** without executing the application. For each bug, mention:

- Bug description
- Severity (Critical / Major / Minor)
- Reason/Impact

Note

- You are **not expected to complete everything perfectly.**
- We evaluate **how you think, structure, and explain**, not just what you write.
